

## **SURFIN' SATO, INC. SATO FOSTER AGREEMENT**

I, \_\_\_\_\_ agree to foster a dog for the rescue organization, Surfin' Sato, Inc., and agree to follow their protocol for newly imported pets. Surfin' Sato will import the dog from Puerto Rico and place the dog in your care according to the importation rules in the state you reside. Once the dog is in your care, you will agree to keep it isolated from other dogs and people (no public places) for at least two weeks and until it receives its Certificate of Veterinary Inspection. During this time, Surfin' Sato, Inc. will oversee and fund the dog's veterinary care. After two weeks isolation, the dog can be adopted. As a foster family, if both parties agree the pet is a good match for your household, you have the first option to adopt the dog.

Be advised that dogs imported from tropical regions such as Puerto Rico have possibly been exposed to diseases and health risks that could pose a threat to your family, pets and human. All imported dogs will have been in isolation in Puerto Rico. They will have been screened and vaccinated against major diseases and given the requisite health certificate for flying. With this, and the two week isolation with appropriate vetting once they arrive, we hope to minimize the risk.

By signing this agreement you acknowledge the above described risk and commitment to the pet.
